

# Letter of Recommendation

**To Whom It May Concern,**

As Senior Software Engineering Manager at GE Healthcare, I had the pleasure of supervising Zsombor Czaban during his 14-month internship as a Software Engineer Intern. Zsombor consistently demonstrated strong motivation, technical skill, and delivered high-quality results.

He quickly ramped up by mastering our ALM requirement management tool and enhanced a custom Java-based utility using its REST API, significantly streamlining engineering workflows. Later, he joined a team developing a Customer Onboarding Tool, contributing across backend (Go) and frontend (TypeScript), as well as in testing efforts.

Zsombor's agility, creativity, and collaborative spirit stood out. Despite being the most junior team member, he made a lasting impact and earned the respect of his peers. Had he not pursued an MSc abroad, I would have gladly offered him a full-time role.

I wholeheartedly recommend Zsombor for any future opportunity.

**Sincerely,**

Zoltan Csongradi

Senior Software Engineering Manager

GE Healthcare
